- Visual Studio Code, Gearset, Postman, Data Loader, JsFiddle
- Lightning App Builder & Lightning Experience Customization, Data Modelling, Security Configuration, Validation Rules, Email Services, Custom Setting, App Manager
- Process Builder, Flows, Workflows and other automation tools

EXPERIENCE

TechnoMile India Pvt. Ltd

May 2021 – Present

Software Engineer (Product Engineering Team Salesforce)

Product Name: GROWTH Suite

TechnoMile's Growth Suite is purpose-built to help GovCon, aerospace and defence, and other types of federal contractors address the complexities of selling to the federal government.

Feature Name: Relationship Mapper (RM)

Relationship mapper is used to visually track and gain insight into the key influencers within an agency's power structure and decision-making processes, allowing the team to build more strategic call plans and prioritise building the right relationships within an account.

Roles & Responsibilities

- Worked on the jQuery OrgChart plugin and successfully enhanced and implemented new requirements in Relationship Mapper, which was built using Aura Components.
- Developed Relationship mapper admin component (Aura) which is used by admins to configure the fields that they have to show on contact cards.
- Developed Export Functionality using Aura Component which is used to export data present in Relationship Mapper into Word, Excel, PDF, and PPT formats. For PPT exporting, I used the third-party library PptxgenJs.
- Did POC and developed LWC, which uses Balkan OrgChart as a third-party library. This is to replace the previously used jQuery Orgchart library as per new business requirements.

Feature Name: Strategic Selling Scorecard

Strategic Selling Scorecard highlights critical activities expected during each stage and enforces and tracks their completion.

Roles & Responsibilities

- Developed Aura Component. Used Document object to store data in the form of a JSON string. Also implemented and suggested solutions for new business requirements for previously built components.
- Merged two triggers into one that were on same object and also migrated process builders to flows.
- Resolved bugs and implemented bulkified as well as out-of-the box solutions wherever required.

Feature Name: PWin/PGO Calculators

With PWin/PGO Admin Pages, clients can tailor the questions and weighting to align with their organization's specific needs and preferences. This enables easy calculation throughout an opportunity's lifecycle and allows clients to strategically focus resources where they have the highest probability of winning.

Roles & Responsibilities

- Developed PGO Admin Component using LWC, which is used to create a questionnaire to check whether the organization needs to go for that particular opportunity or not.
- Managed large number of records, worked with junction object and also resolved bugs.
- Applied new changes and requirements to previously built PWin aura component maintaining a stable and optimised user experience.
- Filtering PWin/PGO Questions based on Opportunity Record Type (Ongoing) for both Admin and User side components.

Feature Name: Account Management App

More successfully retain and grow strategic accounts. 360-degree view of each account and its health. RM, call planning Pipeline analysis, risk mitigation tracking and automated account plan generation.

Roles & Responsibilities

- Find and resolved Salesforce DataTable related issues in Account Management.
- Configured AM in various org, giving required permissions for Objects, Apex Classes, VF Pages and so on. Also migrated code from Development to Production Org.

Feature Name: Global Calendar and TSO Related Changes

Global Calendar is used to track and plan meetings and events in Organization. TSO is organizational setup that includes various out-of-the-box functionalities.

Roles & Responsibilities

- Developed and maintained an Aura Component, which used the fullcalendar 3.0 plugin to meet the needs of clients. Also created calendar in JavaScript to export events data in MS Word format.
- Created Scheduled Trigger Flows, Validation Rules, Compact Layouts, Page Layouts, Lightning Pages, Reports and Dashboards, Email Alerts and Templates to fulfil TSO requirements.
- Developed Apex Scripts to install some records by default on first time product installation using Post Installation Scripts. Also worked on Metadata Service Class to create Email Services.
- Worked on the **Salesforce Security Review 2023** and made changes as per the latest security standards. Improved code quality and followed best practises to eliminate vulnerabilities in code.
- Worked extensively on Apex triggers, Apex classes and Apex test classes to fulfil the requirement. Followed best practises and standards for accessibility and cross-browser.

PERSONAL DETAILS
